CAREER OBJECTIVE

Computer Science student focused on Cybersecurity and Offensive Security, with hands-on experience in web security, penetration-testing labs, Linux, networking, and CTFs. Seeking an opportunity to apply my practical skills in a professional environment while continuing to develop as a penetration testing and cybersecurity professional.

EDUCATION

Bachelor of Computer Science — Cybersecurity & Networking Focus

Current Status: 6th Semester Student, with a focus on Offensive Security.

TECHNICAL SKILLS

Networking: TCP/IP, DNS, DHCP, VLANs, firewall fundamentals, network analysis

Offensive Security: Metasploit, Nmap, Burp Suite, Gobuster, Netcat, Hydra, SQLmap

Systems & Scripting: Kali Linux, Linux permissions, SSH, basic Bash scripting

Web Application Security: SQLi, XSS, CSRF, Command Injection, File Upload, Directory Traversal

KEY PROJECTS

Hack The Box – "Connected" (FreePBX 16)

- Exploited CVE-2025-57819 through SQL injection to gain a remote shell as the `asterisk` user.
- Investigated privilege escalation through an incron misconfiguration.

Network Scanning & Enumeration Lab | 2026

- Performed network discovery and service enumeration using Nmap against a controlled lab environment.
- Identified open ports, running services, service versions, and potential attack surfaces.
- Documented enumeration results and security observations.

CERTIFICATIONS & TRAINING

Certified Ethical Hacker (CEH v13) – EC-Council | In Progress, 2026

- Focus: penetration testing methodology and iLabs practical training.

CAPen (Certified AppSec Pentester) – TPTE | In Progress, 2026

- Focus: web application security, API testing, and manual exploitation using PortSwigger Web Security Academy and Burp Suite.

Cybersecurity Fundamentals – Dursikshya | 2024

- Linux administration, cryptography, threat analysis, risk assessment, and practical penetration testing labs.

LEARNING PATHS

- Practicing Web Application Security through PortSwigger Web Security Academy and hands-on vulnerable web applications.
- Completing TryHackMe cybersecurity labs covering Linux, networking, reconnaissance, enumeration, privilege escalation, and penetration testing.
